We care for the environment

We care about the beautiful environment that surrounds us.

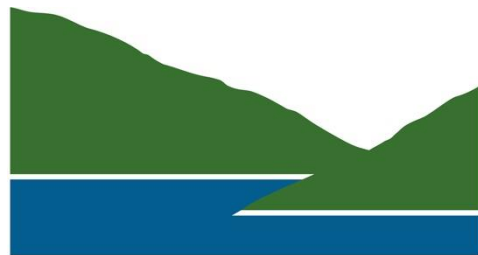

We support a range of local community initiatives that have a similar vision, to preserve and restore the environment we live and work in. Key support includes:

The Marlborough Sounds Restoration Trust focuses on conservation work in the Sounds, primarily the systematic control of wilding pines to encourage the regeneration of native bush and restore the iconic natural landscape of the Marlborough Sounds.

Kaipupu Wildlife Sanctuary is a community-led project restoring a 40-hectare peninsula in Picton Harbour through regeneration of native bush and wildlife, including planting of native seedlings, the release of native bird species and other conservation work.

ENDEAVOUR INLET CONSERVATION TRUST

The Endeavour Inlet Conservation Trust works to protect and enhance the incredible native ecosystems that make Endeavour Inlet and the Marlborough Sounds so special and unique.

Picton Dawn Chorus is a hugely successful community-driven programme that aims to reduce the number of introduced predator species in and around the Picton township that threaten our native flora and fauna.

Marlborough Sounds

The Marlborough Sounds is a unique series of waterways created from ancient sunken valleys which have created a coastline that takes up 20% of New Zealand's coastline.

Cougar Line operates from Picton in Queen Charlotte Sound, which is the main inter-island ferry port for the South Island.

Marlborough's location

Marlborough is centrally located in New Zealand, and Marlborough Airport in Blenheim is a short flight from Auckland or Wellington – with a half hour drive to Picton where you can catch a Cougar Line boat. It is also a three-hour ferry journey from Wellington, or you can drive from Nelson or Christchurch.
